Interqual note (McKesson Provider Technologies website):	Healthcare organizations rely on InterQual® products for a clinically validated approach to decision-making that promotes care facilitation, quality and patient satisfaction. For almost 30 years, InterQual Criteria have set the industry standard for appropriateness of care recommendations. Today, InterQual clinical decision support tools are used by more than 3,000 licensed health plans, hospitals, academic medical centers and government agencies that serve more than 100 million people across the continuum of care.				
Statement of Consideration (SOC):	If an agency receives public comments regarding a regulation it is required to submit a written response known as a statement of consideration (SOC) to LRC addressing the comments.				
ARRS note:	An agency may request a 30-day extension on a statement of consideration (SOC) if it rec'd a substantial volume of comments. DMS has requested (and rec'd) 30-day extensions before if comments are complex (and DMS needs add'l time to consider them).
